Tactical gloves for military and police

Defence gloves meet the current needs of military and police forces of the 21st century and are fully compatible with NATO equipment. We focus on protecting the user in extreme conditions. For the production of these gloves, we use special textiles, functional materials, and naturally treated leather. We supply these products not only to European NATO armies but also to police forces around the world.

Please note that slight color variations are common in the manufacturing process.

Be careful in all activities! No glove can provide a hundred-per-cent protection!

Please, read carefully our maintenance instructions after purchasing. Storage the gloves in the dark and dry environment.

HOLIK WASHING GEL

The washing gel is natural based for leather and textile gloves with high washing efficiency. It reduces bacteria, does not pollute the environment and is fully biodegradable (Eco-Friendly).

HOLIK EMULSION

The Holik emulsion protects against water, oil, dirt and revives the colour. Adding fat to the leather prevents the leather from hardening during drying.

IMPREGNATION SPRAY HOLIK

A highly effective impregnating spray for leather and textiles that protects against moisture, water, oil and dirt while maintaining the breathability of the material.
